

**Computing Progression Map**

<p><b>Essential knowledge for an effective coder and user of technology:</b></p> <ul style="list-style-type: none"> <li>• To have the knowledge of computer networks and systems.</li> <li>• To have the knowledge to become competent in coding for a variety of practical and inventive purposes including the application of ideas with other subjects.</li> <li>• To have knowledge of information technology to create programs, systems and a range of content.</li> </ul>	<p><b>Essential skills for an effective coder and user of technology:</b></p> <ul style="list-style-type: none"> <li>• To be able to connect with others safely and respectfully understanding the need to act within the law with moral and ethical integrity.</li> <li>• To be able to communicate ideas well by using applications and devices throughout the curriculum.</li> <li>• To be able to collect, organise and manipulate data effectively.</li> <li>• To be able to program effectively.</li> <li>• To be able to use technology to create media</li> </ul>
--	---

*The teaching of computing should develop computational thinking to help pupils contribute to the society they will live in as adults.  
The teaching of computing should educate pupils how to use technology safely and responsibly.*

	<u>Key Stage 1</u>	<u>Lower Key Stage 2</u>	<u>Upper Key Stage 2</u>
	<p><b>Essential Opportunities</b></p> <ul style="list-style-type: none"> <li>• Understand what algorithms are, how they are implemented as programmes on digital devices and that programmes execute following a sequence of instructions.</li> <li>• Write and test simple programs.</li> <li>• Use logical reasoning to predict the behaviour of simple programmes.</li> <li>• Organise, store, manipulate and retrieve data in a range of digital formats.</li> <li>• Communicate safely and respectfully online, keeping personal information private and recognise common uses of information technology outside of school.</li> </ul>	<ul style="list-style-type: none"> <li>• Design and write programmes that accomplish specific goals including controlling or simulating physical systems; solve problems by decomposing them into smaller parts.</li> <li>• Use sequence, selections and repetition in programmes; work with variables in various forms of input and output; generate appropriate inputs and outputs to test programmes.</li> <li>• Use logical reasoning to explain how a simple algorithm works, detect and correct errors.</li> <li>• Understand computer networks including the internet; how they can provide multiple services such as the world wide web; and the opportunities they offer for communication and collaboration.</li> <li>• Describe how internet search engines find and store data; use search engines effectively; evaluate digital content; use technology respectfully, responsibly, securely and safely.</li> <li>• Select, use and combine a variety of software on a range of devices.</li> </ul>	
<p><b>Programming:</b></p> <p><b>Using:</b></p> <p><b>ScratchJunior (KS1)</b> <b>Beebots (KS1),</b> <b>Scratch (KS2)</b></p> <p><b>Crumble Kits (Y5)</b> <b>Microbits (Y6)</b></p>	<p><b>Moving a robot:</b></p> <ul style="list-style-type: none"> <li>• To explain what a given command will do</li> <li>• To act out a given word</li> <li>• To combine 'forwards' and 'backwards' commands to make a sequence</li> <li>• To combine four direction commands to make sequences</li> <li>• To plan a simple program</li> <li>• To find more than one solution to a problem</li> </ul> <p><b>Programming animations:</b></p> <ul style="list-style-type: none"> <li>• To choose a command for a given purpose</li> <li>• To show that a series of commands can be joined together</li> <li>• To identify the effect of changing a value</li> <li>• To explain that each sprite has its own instructions</li> <li>• To design the parts of a project</li> <li>• To use my algorithm to create a program</li> </ul> <p><b>Robot algorithms:</b></p> <ul style="list-style-type: none"> <li>• To describe a series of instructions as a sequence</li> <li>• To explain what happens when we change the order of instructions</li> <li>• To use logical reasoning to predict the outcome of a program</li> <li>• To explain that programming projects can have code and artwork</li> <li>• To design an algorithm</li> <li>• To create and debug a program that I have written</li> </ul> <p><b>Programming quizzes:</b></p>	<p><b>Sequencing sounds:</b></p> <ul style="list-style-type: none"> <li>• To explore a new programming environment (Scratch)</li> <li>• To identify that commands have an outcome</li> <li>• To explain that a program has a start</li> <li>• To recognise that a sequence of commands can have an order</li> <li>• To change the appearance of my project</li> <li>• To create a project from a task description</li> </ul> <p><b>Events and actions in programs:</b></p> <ul style="list-style-type: none"> <li>• To explain how a sprite moves in an existing project</li> <li>• To create a program to move a sprite in four directions</li> <li>• To adapt a program to a new context</li> <li>• To develop my program by adding features</li> <li>• To identify and fix bugs in a program</li> <li>• To design and create a maze-based challenge</li> </ul> <p><b>Repetition in shapes:</b></p> <ul style="list-style-type: none"> <li>• To identify that accuracy in programming is important</li> <li>• To create a program in a text-based language</li> <li>• To explain what 'repeat' means</li> <li>• To modify a count-controlled loop to produce a given outcome</li> <li>• To decompose a task into small steps</li> <li>• To create a program that uses count-controlled loops to produce a given outcome</li> </ul>	<p><b>Selection in physical computing:</b></p> <ul style="list-style-type: none"> <li>• To control a simple circuit connected to a computer</li> <li>• To write a program that includes count-controlled loops</li> <li>• To explain that a loop can stop when a condition is met</li> <li>• To explain that a loop can be used to repeatedly check whether a condition has been met</li> <li>• To design a physical project that includes selection</li> <li>• To create a program that controls a physical computing project</li> </ul> <p><b>Selection in quizzes:</b></p> <ul style="list-style-type: none"> <li>• To explain how selection is used in computer programs</li> <li>• To relate that a conditional statement connects a condition to an outcome</li> <li>• To explain how selection directs the flow of a program</li> <li>• To design a program that uses selection</li> <li>• To create a program that uses selection</li> <li>• To evaluate my own program</li> </ul> <p><b>Variables in games:</b></p> <ul style="list-style-type: none"> <li>• To define a 'variable' as something that is changeable</li> <li>• To explain why a variable is used in a program</li> <li>• To choose how to improve a game by using variables</li> <li>• To design a project that builds on a given example</li> <li>• To use my design to create a project</li> <li>• To evaluate my own project</li> </ul>

<b>Key Vocabulary</b>	Programme, code, algorithm, motion, direction, turn, sound, control, specify, input, event, social media, site, applications, database.	Programme, code, algorithm, motion, direction, turn, sound, control, specify, input, event, social media, site, applications, database, coordinate, appearance, sequence, changes, conditions, IF, THEN, blog, copyright.	Programme, code, algorithm, motion, direction, turn, sound, control, specify, input, event, social media, site, applications, database, coordinate, appearance, sequence, changes, conditions, IF, THEN, ELSE, blog, copyright, rotation, degrees, layers, upload, fade, effects, broadcasting, collaborate, risk, network, manipulate, data.

Computational thinking allows us to take a complex problem, understand what the problem is and develop possible solutions. We can then present these solutions in a way that a computer, a human, or both, can understand.

There are four key techniques (cornerstones) to computational thinking:

1. decomposition - breaking down a complex problem or system into smaller, more manageable parts
2. pattern recognition – looking for similarities among and within problems
3. abstraction – focusing on the important information only, ignoring irrelevant detail
4. algorithms - developing a step-by-step solution to the problem, or the rules to follow to solve the problem
